#### **SECTION 2: HAZARD(S) IDENTIFICATION**

CLASSIFIED AS HAZARDOUS ACCORDING TO SAFE WORK AUSTRALIA CRITERIA

### CLASSIFIED AS DANGEROUS GOODS BY THE CRITERIA OF THE ADG CODE

WARNING

**GHS Classification:** 

Label Elements: Signal Word:

Gases Under Pressure: Compressed Gas

Pictogram(s):

• • • •	
Hazard Statements:	H280 – Contains gas under pressure; May explode if heated.
Prevention Statements:	None allocated
Response Statements:	None allocated
Storage Statements:	P410 + P403 Protect from sunlight. Store in a well-ventilated place.
Disposal Statements:	None allocated
Other Hazards:	Asphyxiant. In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation.

# **SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS**

#### Substances / Mixtures

Ingredient	CAS Number	EC Number	Content
ARGON	7440-37-1	231-147-0	82%
CARBON DIOXIDE	124-38-9	205-696-9	18%

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section

# **SECTION 4: FIRST AID MEASURES**

**Description of First Aid Measures** 

Eyes: Inhaled: Not applicable. Remove from exposure, but avoid becoming a casualty. To protect rescuer, use an Air-line respirator or Self-Contained Breathing Apparatus

	Give Oxygen if available. Rest and keep warm. Obtain medical attention. For advice contact Poisons Information Centre Ph: 13 11 26 or a doctor.		
Skin:	Not applicable.		
Ingestion:	Ingestion is not considered a potential route of exposure.		
First Aid Facilities	Not applicable		
Most important symptoms and eff			
, , , , , , , , , , , , , , , , , , ,	In high concentrations may cause asphyxiation. Symptoms may include loss of mobility / consciousness. Victim may not be aware of asphyxiation.		
Immediate medical attention and			
SECTION 5: FIRE FIGHTING M	IEASURES		
Extinguishing Media:	Use water fog to cool containers from protected area.		
Special hazards arising from the			
	Non-Flammable.		
Advice for Firefighters: Hazchem Code:	Temperatures in a fire may cause cylinders to rupture. Cool cylinders or containers exposed to fire by applying water from a protected location. Remove cool cylinders from the path of the fire. Evacuate the area if unable to keep cylinders cool. Do not approach cylinders or containers suspected of being hot. 2TE 2 - Fine Water Spray T - Wear full fire kit and breathing apparatus. Dilute spill and run off. E – Evacuation of people in and around the immediate vicinity of the incident should be considered.		
SECTION 6: ACCIDENTAL RE	LEASE MEASURES		
Personal precautions, protective equipment and emergency procedures.			
Non-emergency personnel:	No action shall be taken involving any personal		

# SEC

Non-emergency personnel:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Avoid breathing gas. Provide adequate ventilation. If the cylinder is leaking, evacuate area of personnel. Inform manufacturer/supplier of leak. Use Personal Protective Equipment (PPE) as detailed in Section 8 of the SDS.
Environmental Precautions:	Prevent from entering sewers, basements and work pits, or any place where its accumulation can be dangerous.
Methods of cleaning up:	Carefully move to a well-ventilated area. Allow gas to escape to atmosphere, preferably in an open remote location. Do not attempt to repair leaking valve or cylinder safety devices.
Reference to other sections:	See Section 8 for Exposure Controls and Section 13 for disposal considerations

# SECTION 7: HANDLING AND STORAGE

Precautions for Safe Handling.	Use safe work practices to avoid inhalation. Use appropriate personal protective equipment (see Section 8). Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement. Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Use equipment rated for cylinder pressure. Close valve after each use and when empty. The uncontrolled release of a gas under pressure may cause physical harm.
	physical hann.

## Conditions for safe storage, including any incompatibilities.

Store cylinders below 45oC upright in a secure enclosure, preferably outside of buildings, protected from direct sunlight. Cylinders should also be stored in a dry, well ventilated area constructed of non-combustible material with firm

100%

# SECTION 10: STABILITY AND REACTIVITY

## Reactivity.

Chemical Stability.

Possibility of Hazardous Reactions.

Conditions to Avoid. Incompatible Materials. No specific test data related to reactivity available for this product or its ingredients. Carefully review all information provided in sections below. Stable under recommended conditions of storage.

Under normal conditions of storage and use, hazardous reactions will not occur. Avoid contact with incompatible substances. Moist carbon dioxide is corrosive, hence acid resistant materials are required (e.g. stainless

PUREGAS

rubbers may be affected by carbon dioxide (i.e. embrittlement, leaching of plasticisers, etc).

#### Hazardous Decomposition Products.

This material will not decompose to form hazardous products other than that already present.

## SECTION 11: TOXICOLOGICAL INFORMATION

## Information on Toxicological Effects.

Acute Toxicity:	Based on available data the classification criteria are not met. Low concentrations of Carbon
	Dioxide cause increased respiration and
	headache
Skin:	Not irritating to the skin.
Eves:	Not irritating to the eye.
Sensitisation:	Not classified as causing skin or respiratory sensitisation.
Mutagenicity:	No significant ingredient is classified as a mutagen.
Carcinogenicity:	No significant ingredient is classified as a carcinogen.
Reproductive:	No significant ingredient is classified as a reproductive toxin.
STOT Single Exposure:	Asphyxiant. Effects are proportional to oxygen displacement. Over exposure may result in dizziness, drowsiness, weakness, fatigue, breathing difficulties and unconsciousness.
STOT Repeated Exposure:	Not classified as causing organ damage from repeated exposure.
Aspiration:	Not classified as causing aspiration.

#### SECTION 12: ECOLOGICAL INFORMATION

Toxicity.	No information provided.
Persistence and Degradability.	No information provided.
Bioaccumulative Potential.	No information provided.
Mobility in Soil	Not applicable.
Other Adverse Effects	When discharged to the atmosphere, Carbon
	Dioxide may contribute to the greenhouse effect.

# SECTION 13: DISPOSAL CONSIDERATIONS

Waste Treatment Methods

Waste disposal

Legislation

Cylinders should be returned to the manufacturer or supplier for disposal of contents. Disposal of this product, solutions and any byproducts should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

# SECTION 14: TRANSPORT INFORMATION

CLASSIFIED AS DANGEROUS GOODS BY THE CRITERIA OF THE ADG CODE

# **SECTION 16: OTHER INFORMATION**

The storage of significant quantities of gas cylinders must comply with AS4332 The Storage and Handling of Gases in Cylinders. When using this gas/gas mixture for welding, cutting and associated processes, additional hazards may be generated by the process such as radiation, noise and fume. Risk assessments should be made for each activity to identify and quantify the individual hazards involved. APPLICATION METHOD Gas regulator of suitable pressure and flow rating

fitted to cylinder or manifold with low pressure gas distribution to equipment.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

#### HEALTH EFFECTS FROM EXPOSURE

It should be noted that the effects from exposure to this product will depend on several factors including: frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.
